

Brain Power

Evolgen's **IT Operations Analytics** provides the intelligent answers IT Ops have been craving.

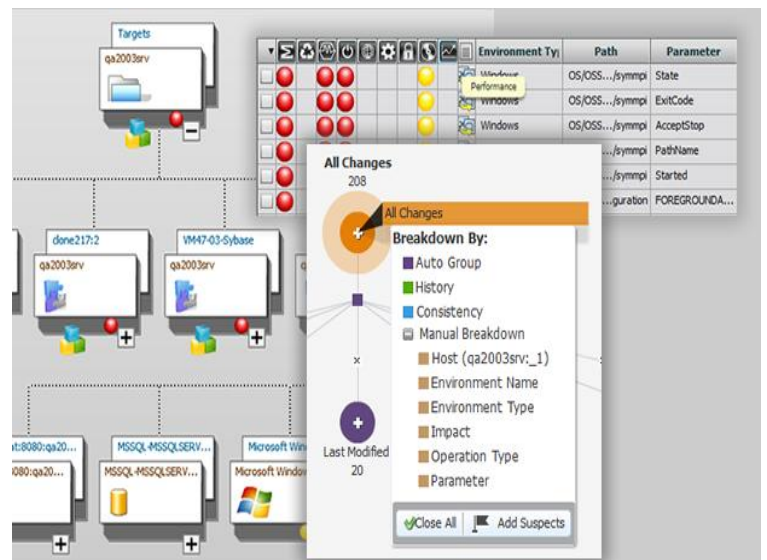

Evolgen applies a new **IT Operations Analytics** approach to the chronic change and configuration challenges. We turn dynamic, overwhelming change and configuration data into clear and **actionable insights**. Evolgen **identifies and reports on all critical changes, differences, inconsistencies and mis-configurations** that threaten the stability of your IT environment.

- ① **Know “what changed” and if it is risky**
- ② **Quickly identify the incident’s root-cause**
- ③ **Auto detect inconsistencies across environments**
- ④ **Validate that releases deploy accurately**

Transforming Change and Configuration Management with IT Operations Analytics.

Today's configuration management and change management tools are **too rigid, too effort intensive** and even worse, they **lack the intelligent analytics** required to deal with complexity of the modern data center, overwhelming configuration data and frequent changes

Evolgen is different.
We give you
actionable insights
based on everything
that matters -
delivered in minutes.

Customers using Evolgen experienced:

40%

reduction
in cost of
downtime

50%

cut
in mean time
to resolution
